

ENGINEERED FOR PRECISION DESIGNED FOR AUDIOLOGY

"A wide product range with high-quality products and a very good customer service."

by Robert Schwemmer

"Excellent service and online support! It's a pleasure to deal with professionals."

by Dmitry Krasnikov

"The service was outstanding. Product is out of this world - so impressed."

by Michelle

Audiology Rooms by DECIBEL

Your Complete In-House Solution for Exceptional Sound Environments in Healthcare

PRIVATE PRACTICE

DECIBEL's custom booths offer private practices precise, soundproof spaces for accurate hearing assessments, ensuring comfort and reliability for patients and professionals alike.

HOSPITALS

Our certified audiology rooms provide hospitals with durable, high-performance soundproofing and acoustics, enhancing diagnostic accuracy and supporting high-quality patient care in clinical settings.

SELECTED PROJECTS

Acoustic Treatment of Audiological Centre

Acoustic Enhancement in Private Hospital

Audiology Room in a Health Centre

OUR APPROACH

Acoustic Engineering

DECIBEL offers modular audiology chambers for all types of hearing testing. From small audiology booths in hearing screening programs and dispensing hearing aids to Pediatric Audiology rooms based on a turnkey approach.

Custom Design

The modular design we offer allows for quick and clean installation programmes, utilises components of best-known acoustic performance, and gives the opportunity for relocation at any stage.

In-House Production

DECIBEL carries out a survey of an existing space or room to develop an acoustic solution that complies with ISO 8253. The proposed scheme includes the structure, finishes, ventilation system and electrical outlets.

Installation and Final Testing

After careful engineering, we manufacture all products in-house. DECIBEL offers on-site installation, followed by comprehensive testing to confirm acoustic performance, functionality, and precision, achieving an environment ready for accurate audiology assessments.

ABOUT US

DECIBEL is a leader in acoustic engineering, specialising in designing, manufacturing, and installing high-performance soundproofing solutions. With over 13 years of expertise and a dedicated in-house team, we create certified, custom-built spaces for healthcare, audiology, and commercial applications, combining precision engineering with acoustic excellence to meet each client's unique demands.
